

Note for the Session Chairmans and Presenters

Dear Session Chairmans and Presenters,

In the parallel sessions of IME2009, the duration of each contributed paper presentation is 20 minutes. In addition to this, just a couple of minutes are allocated for questions and contributions for every presentation. It is important that these time limits are kept carefully for running the sessions and the presentations within their designated time slots.

The presenters are requested to bring their presentations in flash discs to the registration desk (if they have not sent their presentation materials to us up until now) so that they can be uploaded to the session PC's and files on site during the registration hours.

Each session will have a technical and a managerial assistant to facilitate the session operations for the session chairmans, presenters and participants.
